Challenges represent added value. THESIGN is the winning result of a deep work of research, innovation, passion and determination, all made in Italy.

Design inspire the future. THESIGN does not place any limits on the expressive possibilities of anyone, arising from the contamination with different places, cultures and styles. This innovative and unique line of panic exit devices is constructed entirely out of 316 stainless steel, including all internal and external components. This guarantees maximum functionality and a long lifetime even under the most extreme conditions. The rigorously streamlined design transmits strength and elegance and represents added value and an element of continuity. Versatility, elegance, and efficiency in a single product.

THE ONLY ONE ENTIRELY MANUFACTURED IN STAINLESS STEEL INOX 316.
A CULTURE OF EXCELLENCE

Antipanic is a family business with deep roots and an entrepreneurial success story where experts and creatives people design extremely innovative products, which are then produced by our team of highly qualified technicians.

When “Made in Italy” is a perfect synonym for excellence and Italian pride. This is a mission we have always pursued, because the authenticity of Italian products is our company’s strength and our way of life.

Our culture of excellence encompasses an organization geared toward quality, research, innovation, expertise, and the people who work together for the success of our projects.

All of our products are completely conceived, designed, and manufactured in Italy, which allows us to achieve an extremely high level of quality and control.
